Project Name : Student Result Management System

Technology Used : Java, Jsp

Database :
MySQL

Description : Student result management system project having two modules:

1. Student module:

In this module we have to enter roll number to see user or student result. When we enter wrong roll number it will show popup message incorrect roll number. When we enter correct roll number then it moves to next page where we can see results of different subject.

2. Admin module:

In this module we can add new student and add new result. If we want to add an existing roll number or student details then we get error message. We can also see student details and student result.
